

Network Visibility and Security Agility For Healthcare Sector

Healthcare organizations are at a massive stage of digital transformation. As healthcare operations move to electronic medical records, mobile and internet enabled services and internet-enabled sensors and monitors, they have been mandated to comply with regulations to operate with the best security protocols to protect highly sensitive records of their patients across their IT infrastructure. With new telemedicine and high capacity data (MRI images etc.) traversing local and remote networks, optimization of traffic, masking medical

record data, encryption and complete end-to-end visibility on entire digital processes and assets is paramount. Niagara Networks' visibility solutions are deployed in large healthcare organizations and enable pervasive visibility across all entire digital assets. Our partnerships with leading cyber security vendors enable complete set of tools that empower IT team to maintain, detect and prevent hostile attacks on healthcare connectivity infrastructure and valuable research data.

- Inline bypass for threat prevention tools
- 100% packet flow visibility for network traffic intelligence
- NetOps and SecOps tools' efficiency
- Deep visibility into encrypted traffic
- Efficient data traffic collection for forensics/SIEM

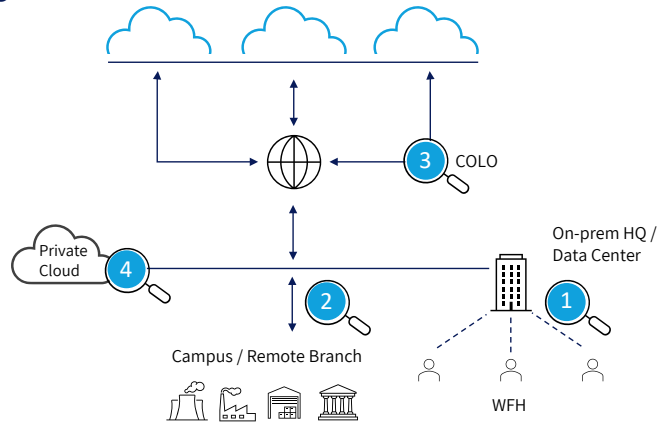

Highlights

- Packet filtering & inspection for all layers up to L7 to enable network intelligence applications
- Aggregation/replication/optimization of traffic from sources to central security and monitoring tools
- High-availability – carrier-grade bypass for in-line tools - maximizing network uptime
- Load Balance for heterogeneous solution tools 1:1, 1+1, n+1 with actionable agile rules
- Tunnel handling: GTP filtering, GRE termination, MPLS/VXLAN filtering and stripping
- Embedded 3rd party virtual security tools into Niagara Networks' Open Visibility Platform
- SSL/TLS Decryption for deep flow visibility

What problems do we solve?

Visibility platform
Positioned at strategic
Point of any network

Streamline & scale networks, services and security posture

Save CAPEX reduce cost of tools and infrastructure optimization

Reduce risks by enabling visibility and access to 100% of production traffic and enable 100% of network/ tools uptime

ABOUT NIAGARA NETWORKS

Niagara Networks™ is a Silicon Valley based company that pioneered the Open Visibility Platform™ to bring desperately needed agility to network security.

Niagara Networks provides high-performance, high-reliability network visibility and traffic delivery solutions for the world's most demanding service provider and enterprise environments.

We Design, Develop and Manufacture our Products in Silicon Valley, USA.
